

## General Help:

The **Dodge County Parcel Viewer** is available using desktop computers, mobile phones, and tablets. The instructions below will help you navigate the parcel viewer.

**SWITCH THE BASEMAP** by clicking on the basemap button  in the upper left hand corner of the window, then selecting the desired basemap.

**Users can FIND AN AREA OF INTEREST** by using the scroll wheel on their mouse to zoom in and out from the cursor location or click the + and – buttons in the upper left hand corner .

**Users can quickly FIND A SPECIFIC PARCEL** by:

Clicking on the Enhanced Search button  in the upper right hand corner and then entering a Property Identification Number (PIN) into the search box OR

Type in the property address using the search bar in the upper right hand corner  

**\*\*Please Note: Address should be typed in with House #, Street Name, Street Type, and Street Direction in ALL CAPS.**

**Users can MEASURE DISTANCES OR AREAS** by clicking on the measure button  in the upper right hand corner and then selecting either distance or area in the results window.

**Users can MARK UP THE MAP** by clicking on the palette button  in the upper right hand corner and then select the desired color, whether to draw a line, polygon, point, or text and adding the markup to the map. Users can enable measurement distance for lines and area for polygons.

**Users can PRINT A MAP** by clicking on the print button  and then adding a custom map title, layout, and format options. The map can be printed from the result window or the map saved to a local drive.

**\*\*Please Note: The 'Creating Map' dialog can take up to a full minute to create the printable document.**

**Users can SELECT MULTIPLE PARCELS** by clicking on the Enhanced Search button  in the upper right hand corner and then clicking the 'By Shape' tab. Choose a 'Select features' shape type and then click the Search button  to highlight the parcels within the shape.
